

xEV motor core copper wire cutting device (COPC)

This is a device for cutting the copper wire coils of xEV motors.

Before processing

After processing

Product Specifications

power supply	AC200V 3 phase
Power consumption	4.0KVA
Air source	Unused
Hydraulic source	Unused
cutting ability	30-80 seconds (excluding attachment/detachment)
Workpiece attachment/detachment	It is attached and detached manually.
Workpiece holding	Turn the handle manually to clamp
Safety measures	shutter
External dimensions	820(W) X 1,650(D) X 2,100(H) (mm)
weight	Approximately 780Kg

- It accommodates a variety of work sizes.
- Automatic operation after startup until disconnection is complete.
- The cutting position is visually confirmed using a laser marker.
- Safety measures using shutters

Note

1. Please read the instruction manual before use and use the machine correctly and safely.
2. Take utmost care to ensure the safety of operators and to prevent damage to the machine.
3. Modifying the machine without permission may cause an accident. Never do so.
